

VICTORIA FIRE DEPARTMENT

2010
ANNUAL REPORT

Philosophy of Operations

MISSION

TO PRESERVE LIFE AND PROPERTY WITH DEDICATED AND CARING SERVICE

The members of the Victoria Fire Department will achieve the Mission by maintaining a positive, productive work environment filled with a professional and highly trained staff

VISION

THE LEADER IN EMERGENCY SERVICE EXCELLENCE

CORE VALUES

The Victoria Fire Department is dedicated to providing excellent service to our customers. The members of the Victoria Fire Department have identified a set of core values for each member to uphold. The actions and decisions of the Victoria Fire Department will reflect these core values.

Professionalism -

Acting with honesty, integrity and respect.

Leadership -

Showing the way with a positive attitude and open communication.

Accountability -

Taking pride in our work & being responsible for our actions.

Teamwork -

All members working together to achieve a common goal.

Employee Well-being -

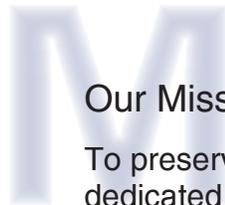

Employee wellness and fitness.

Employee education and professional development.

Encourage and support of employee family life.

Our Mission

To preserve life and property with dedicated and caring service.

The members of the Victoria Fire Department will achieve the Mission by maintaining a positive and productive work environment filled with a professional and highly trained staff.

Destination Excellence

From the Department

THE VICTORIA FIRE DEPARTMENT is pleased to present this annual report for your review. We take pride in serving our customers during their time of need and always seek new ways to keep them from needing us at all. 2010 was another busy year as our call volume increased by one percent, setting a new record for number of emergency responses. By the start of 2011 we will be responding to a different emergency need every hour on the hour, 365 days a year.

The VFD continues looking at ways to improve our response times, particularly in the east and northeast parts of the city where commercial development and growth is slowing emergency response. In 2010, we held the groundbreaking for new Fire Station 2 on Miori Lane near Sam Houston and a dedication ceremony was held in February 2011. The current Fire Station 2 will be renovated into an Administration and Training facility in the future as funds become available.

2010 brought continued improvements in the leadership of the Victoria Fire Department as we focused on leadership, team building and multi-casualty incident training. We extend our thanks for the support that City management and our elected officials provide to the Victoria Fire Department.

Victoria Fire Stations

5

4

Station 1 - 606 E. Goodwin Street

- Engine 1, Medic 1, Ladder 1, Tanker 1, Brush 1 & 2, 903 & 900

Station 2 - 2708 Miori Lane

- Engine 2, Medic 2, Rescue 2, Hazmat 1 & 2 and Medic 6

Station 3 - 4406 E. Lone Tree

- Engine 3, Medic 3 and Engine 10

Station 4 - 2007 Salem Road

- Engine 4, Medic 7, Engine 11, Ladder 4 and the Mobile Command Post

Station 5 - 9508 Zac Lentz Pkwy.

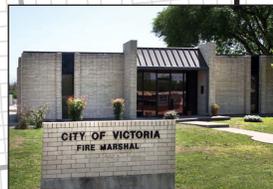

- Engine 5, Medic 5 and the Mass Casualty Incident Trailer

Administrative Services Division

**Fiscal Year
2009-2010**

**Victoria Fire Department
Operating Budget: \$12,680,005
Percentage of Overall City Budget: 9%**

**Revenue
Emergency Medical Services: \$1,671,106.82
Fire Marshal Permits & Fees: \$8,423**

ADMINISTRATIVE SERVICES CHIEF MICHAEL BELT heads this division. His staff consists of a training captain and lieutenant, an administrative captain and lieutenant and a logistical support specialist.

The administrative captain and lieutenant are responsible for coordinating building and apparatus maintenance and ensuring compliance with personal protective clothing regulations and maintenance.

Other duties of this division include training, EMS supplies, EMS quality assurance, and all other support and logistical functions necessary to keep the department running.

Operations Division

THE OPERATIONS DIVISION is probably the most recognizable facet of the Victoria Fire Department. It encompasses most of the function and activities that come to people's minds when they hear the words "Fire Department." It is the foundation and anchor of modern day fire fighting and emergency medical services.

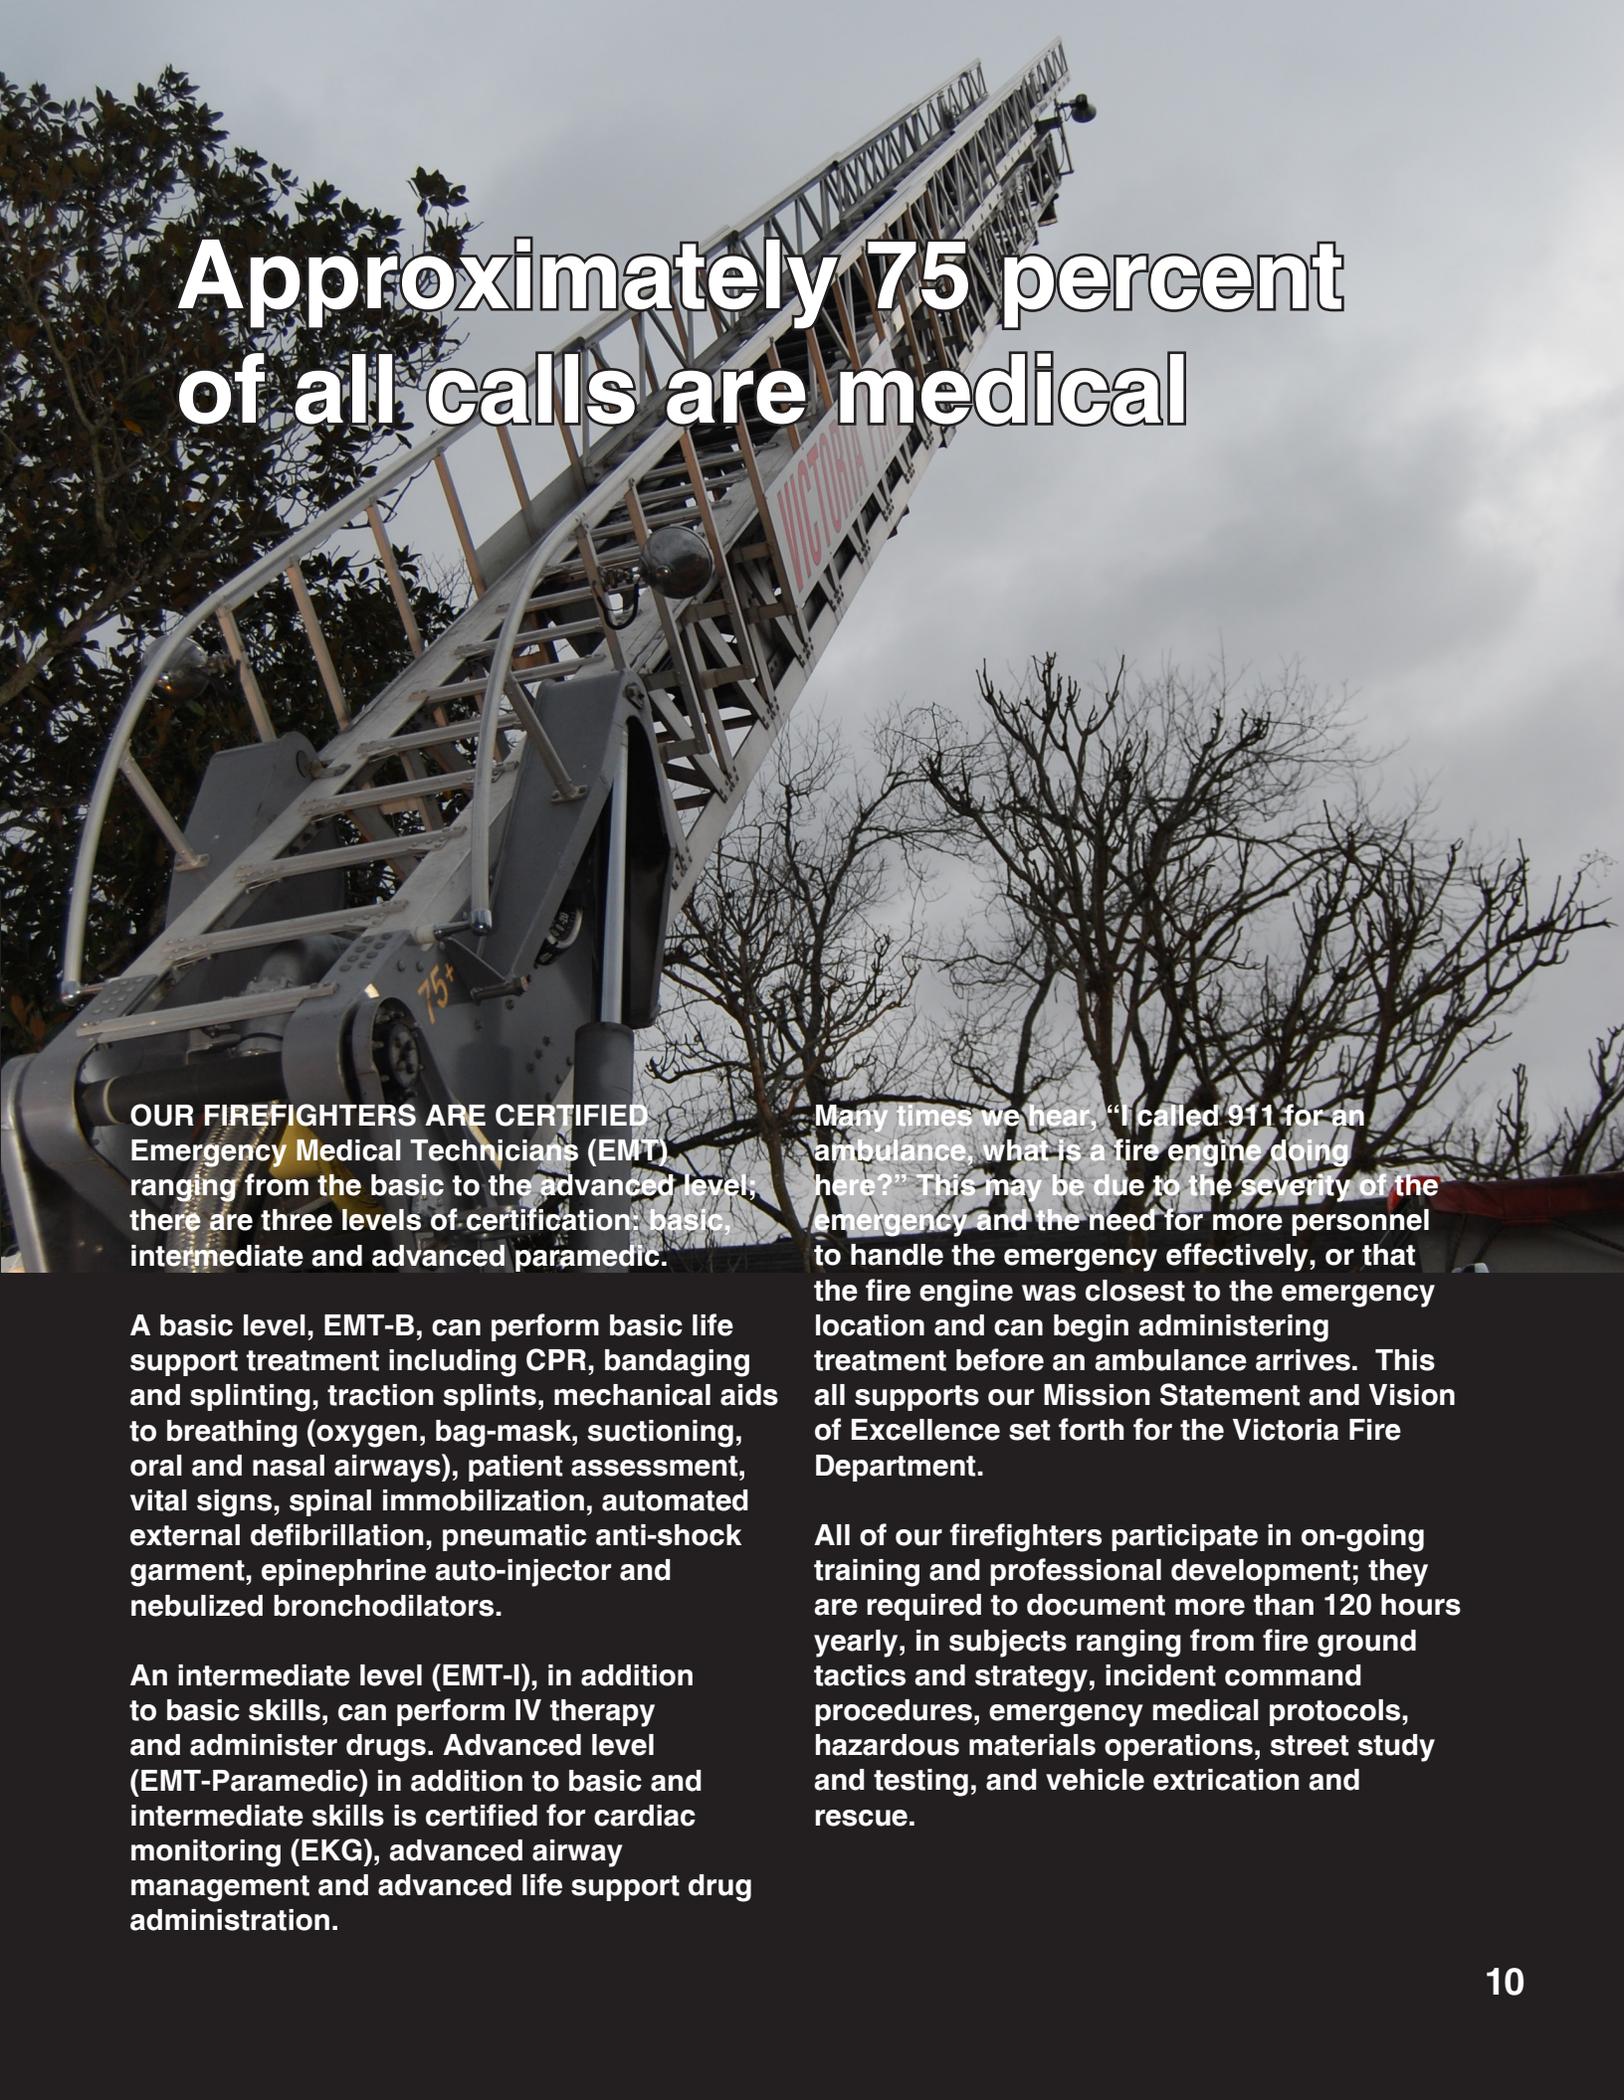

The Operations Division comprises all of the apparatus and firefighters that respond to emergencies when citizens call 911. Firefighters are on duty at fire stations 24 hours a day, seven days a week, 365 days a year, ready to respond to the needs of our customers county wide at a moments notice.

The Operations Division works on a three shift rotation;

A, B and C shift. The three shift rotation places personnel working a 24-hour shift and then off for 48 hours before returning to work.

The Operations Division responds to emergency requests from the public for all types of fires, emergency medical services, motor vehicle accidents, any type of rescue and hazardous materials incidents. The Victoria Fire Department responded to approximately **8,567** incidents in the city and county during the 2010 calendar year. Of these, **5,909** were medical calls; **729** were motor vehicle accidents; **393** were fires of all types and **1,536** were other incidents, such as: hazardous material response, false alarms, good intent calls, etc.

Approximately 75 percent of all calls are medical

OUR FIREFIGHTERS ARE CERTIFIED Emergency Medical Technicians (EMT) ranging from the basic to the advanced level; there are three levels of certification: basic, intermediate and advanced paramedic.

A basic level, EMT-B, can perform basic life support treatment including CPR, bandaging and splinting, traction splints, mechanical aids to breathing (oxygen, bag-mask, suctioning, oral and nasal airways), patient assessment, vital signs, spinal immobilization, automated external defibrillation, pneumatic anti-shock garment, epinephrine auto-injector and nebulized bronchodilators.

An intermediate level (EMT-I), in addition to basic skills, can perform IV therapy and administer drugs. Advanced level (EMT-Paramedic) in addition to basic and intermediate skills is certified for cardiac monitoring (EKG), advanced airway management and advanced life support drug administration.

Many times we hear, “I called 911 for an ambulance, what is a fire engine doing here?” This may be due to the severity of the emergency and the need for more personnel to handle the emergency effectively, or that the fire engine was closest to the emergency location and can begin administering treatment before an ambulance arrives. This all supports our Mission Statement and Vision of Excellence set forth for the Victoria Fire Department.

All of our firefighters participate in on-going training and professional development; they are required to document more than 120 hours yearly, in subjects ranging from fire ground tactics and strategy, incident command procedures, emergency medical protocols, hazardous materials operations, street study and testing, and vehicle extrication and rescue.

Training is Crucial in our Changing Environment

FIREFIGHTERS PARTICIPATE in company level and multi-company training evolutions and exercises. This emphasizes teamwork and coordination during emergency incidents requiring multi-unit responses.

The Victoria Fire Department has now converted to all in-house training for education hours for all VFD Emergency Medical Technicians with the occasional outside organization coming in to give special classes. The department has added a training lieutenant to assist with the in-house training.

Rotation is used to maintain an even coverage of available apparatus across the City while crews are training. This is to ensure that there is a unit covering all stations and districts at all times.

Training is a vital part of our everyday duties. Our fire apparatus are outfitted with automated external defibrillators (AEDs) for cardiac patients, thermal imaging cameras (TICs) to assist with locating victims in smoke-filled environments, and carbon monoxide (CO) detectors to identify unsafe levels of the odorless, colorless gas.

Life Safety Division

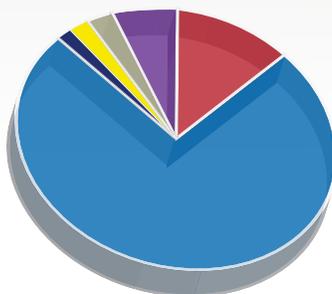

THE LIFE SAFETY DIVISION OF THE VICTORIA FIRE DEPARTMENT, commonly referred to as the Fire Marshal's Office, provides the leadership and inspection services to help prevent fires and assure fire and life safety for people who live, work and visit Victoria.

The division consists of a five member team; Fire Marshal John Bradley, Computer Specialist Elaine Mayer and three investigators. Office hours: Monday-Friday, from 8 a.m.-5 p.m.

The Victoria Fire Marshal's office is responsible for fire inspections and investigations, construction plan review, fire alarm and fire sprinkler system plans and testing, public education, construction consultation and advisement.

Victoria Fire Department Fire Investigators determine cause and origin of fires; investigators are certified as firefighter/EMTs and peace officers. The Life Safety Division is located at 1703 E. Airline Road.

Fire Marshal's Office 2010 Statistics

- General Fire Code Inspections - 1,253** (Commercial & Residential)
- Certificate of Approvals - 194** (For occupancy)
- Official Plan Review - 114** (Commercial plans for fire code compliance)
- Public Education - 44** (Fire & Safety programs and presentations)
- Other - 40** (Assisting other divisions within City)
- Fire Investigations - 24** (Fire and Arson with 4 arrests)

A Firefighter's Prayer

*When I am called to duty, God
wherever flames may rage
give me strength to save some life
whatever be its age.*

*Help me to embrace a child
before it is too late
or save an older person
from the horror of that fate.*

*Enable me to be alert
and hear the weakest shout
and quickly and efficiently
put the fire out.*

*I want to fill my calling
and give the best in me
to guard my every neighbor
and protect his property.*

*And if, according to my fate
I am to lose my life
please bless with your protecting hand
my children and my mate.*

Victoria Fire Department **Chaplains**

WITHOUT HESITATION, when an emergency arises, local ministers answer the call. Whether it's a structure fire, accident, or loss of life, these dedicated individuals are on the scene to provide prayer and emotional strength day or night.

The Chaplaincy Program, initiated eight years ago, draws men and women from Lutheran, Methodist, Presbyterian, Baptist and Catholic faiths. Each chaplain must be an ordained minister from a local congregation.

Chaplaincy Program

THE VICTORIA CIVILIAN FIRE ACADEMY ALUMNI ASSOCIATION, since its creation in 2007, has been instrumental in assisting the Victoria Fire Department during fires, with fund raising, educational support and promoting the fire department to the community. The organization currently boasts more than 25 active members. Local citizens interested in taking an active role in their community and the Victoria Fire Department are drawn to the association.

In 2010, members worked more than 2,000 hours in service to the community, offering refreshments and food to rehabilitate firefighters during local disasters, assisting with Fire Prevention Week programs and raising money to fund various projects.

The VCFAAA donated \$4,000 for scholarships to local Fire Academy students, \$1,000 to the Life Safety Clown program, and a Bronze Bell for the Honor Guard in 2009.

VCFAAA members consist of all ages and genders, and come from many backgrounds of experience--all with one desire, to support and supplement resource-constrained fire and emergency services in our city and county. VCFAAA is a non-profit organization.

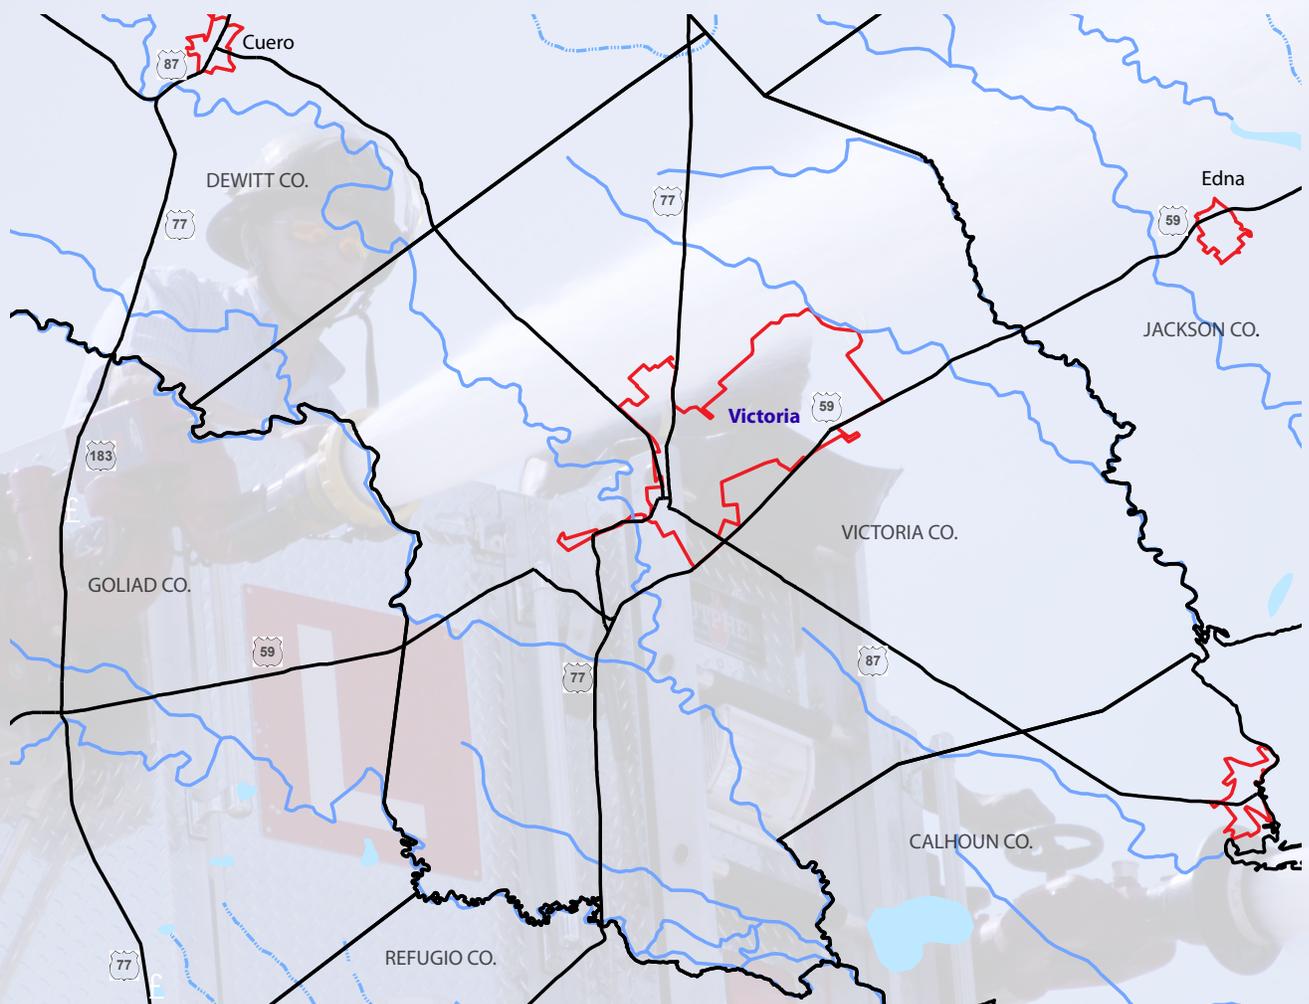

2011 VCFAAA Executive Officers

Jeanie Fossati, *President*
Korie Krohn, *Vice President*
Janie Carrales, *Secretary*
John Flores, *Treasurer*
Donna Odem, *VCFAAA/
VFD Liaison*

Response Area

THE VICTORIA FIRE DEPARTMENT RESPONDS TO ALL OF VICTORIA COUNTY which is an area of approximately 882 square miles. The population in the city limits at the last census was 64,086 with an additional 23,703 residents in the county for a combined population of 87,790. The VFD responded to 8,567 calls in 2010.

In addition to the resident population, Victoria has a large transient population. Located at the hub of highways 59, 77 and 87, Victoria is the gateway to San Antonio, Houston, Corpus Christi, the Rio Grande Valley and the Gulf Coast.

Definitions:

INCIDENTS – Based on total responses for 2010.

SERVICES – Identified the types of emergencies in which the agency responds and handles through a 911 Center.

F – FIRE
M – EMERGENCY MEDICAL
H – HAZMAT
R – TECHNICAL RESCUE

ISO RATING – Established by the Insurance Service Organization for Fire Departments; rating is on a scale of 1-10, with 1 being the best possible score.

APPARATUS / STAFFING – Minimum staffing per unit is indicated under apparatus type. For example, the code (5 / 3P) under the Engine Category indicates the department has 5 engine companies staffed with at least 3 personnel at any give time.

FRO – First Responders Only: These cities do not have ambulances.

CHIEF – Identifies the number of Operations Chiefs assigned to a 24-hour period.

2010 City/County Incidents

Strategic Planning

THE VICTORIA FIRE DEPARTMENT FORMED A STRATEGIC PLANNING COMMITTEE in January of 2003. The committee is comprised of seven members of varying rank and time of service. This diverse group provides for the objective development of the strategic plan.

The Strategic Planning Committee's objective is to develop a plan that provides the department with a "roadmap" to the ideal future. This "roadmap" to the future assures the department will provide the highest quality of service possible to our customers.

The Victoria Fire Department (VFD) believes an "Ideal Future" can be achieved through an effective strategic plan. A strategic plan also allows the VFD to stay on the leading edge of technology and service to the community, as well as improving the productivity of its members through a focus and direction for the future.

Strategic planning is continuous. Once the steps in the process are completed, they are reviewed annually, along with the budget, to make the necessary adjustments.

Step 1: Internal Assessment

- Department Member Value Assessment
- Department Strengths and Weaknesses

Step 2: External Assessment

- Customer Survey
- Key Stakeholder Survey (Rotary Club, Local Elected Officials)

Step 3: Data Interpretation

- The data from the internal and external surveys are compiled and coded to establish an information bank that is used throughout the completion of the plan.

Step 4: Establish Philosophy of Operations

- Values – Mission – Vision – Slogan

Step 5: Establish Strategic Issues

- Broad goals that are driven by the Philosophy of Operations

Step 6: Develop strategies and action plans to accomplish

- Strategic Issues
- A list of objectives / action plans that help achieve each one of the Strategic Issues

Step 7: Review / Revise

The surveys assessed the department members' personal values, perceived strengths and weaknesses of the organization, department actions and situations that are positive, and department actions and situations that they could change if possible.

The Strategic Planning Committee will use the surveys to guide the strategic planning process in making the Victoria Fire Department a highly successful organization and a highly desired organization for employment.
