Downtown Water and Sewer Line Replacements (Phase I, Projects 1 & 2)
Construction Notification
Beginning Friday, June 19, 2009

(VICTORIA, TEXAS) The City will begin the construction of the Phase I Downtown Water and Sewer Line Replacement Projects beginning on Friday, June 19, 2009. This set of projects includes the replacement of water and sewer lines on Main Street and Glass Street between Commercial and Juan Linn Streets, as well as portions of William, Constitution, Santa Rosa, Goodwin, Commercial and Bridge Streets.

The contractor will be performing investigative excavation to determine the locations of any potential conflicts at the following intersections:

William Street and Constitution Street
Constitution Street and Liberty Street
Constitution Street and Main Street

Following the investigative excavation, the contractor, Triple B Services, LLP, plans to begin replacing the water line on Glass Street from Juan Linn to Commercial Street beginning at Juan Linn and moving North and replacing the sewer line in William Street from Juan Linn to Constitution Street.

This Glass Street waterline replacement and the William Street sewer line replacement will remain in effect for approximately two months, weather permitting.

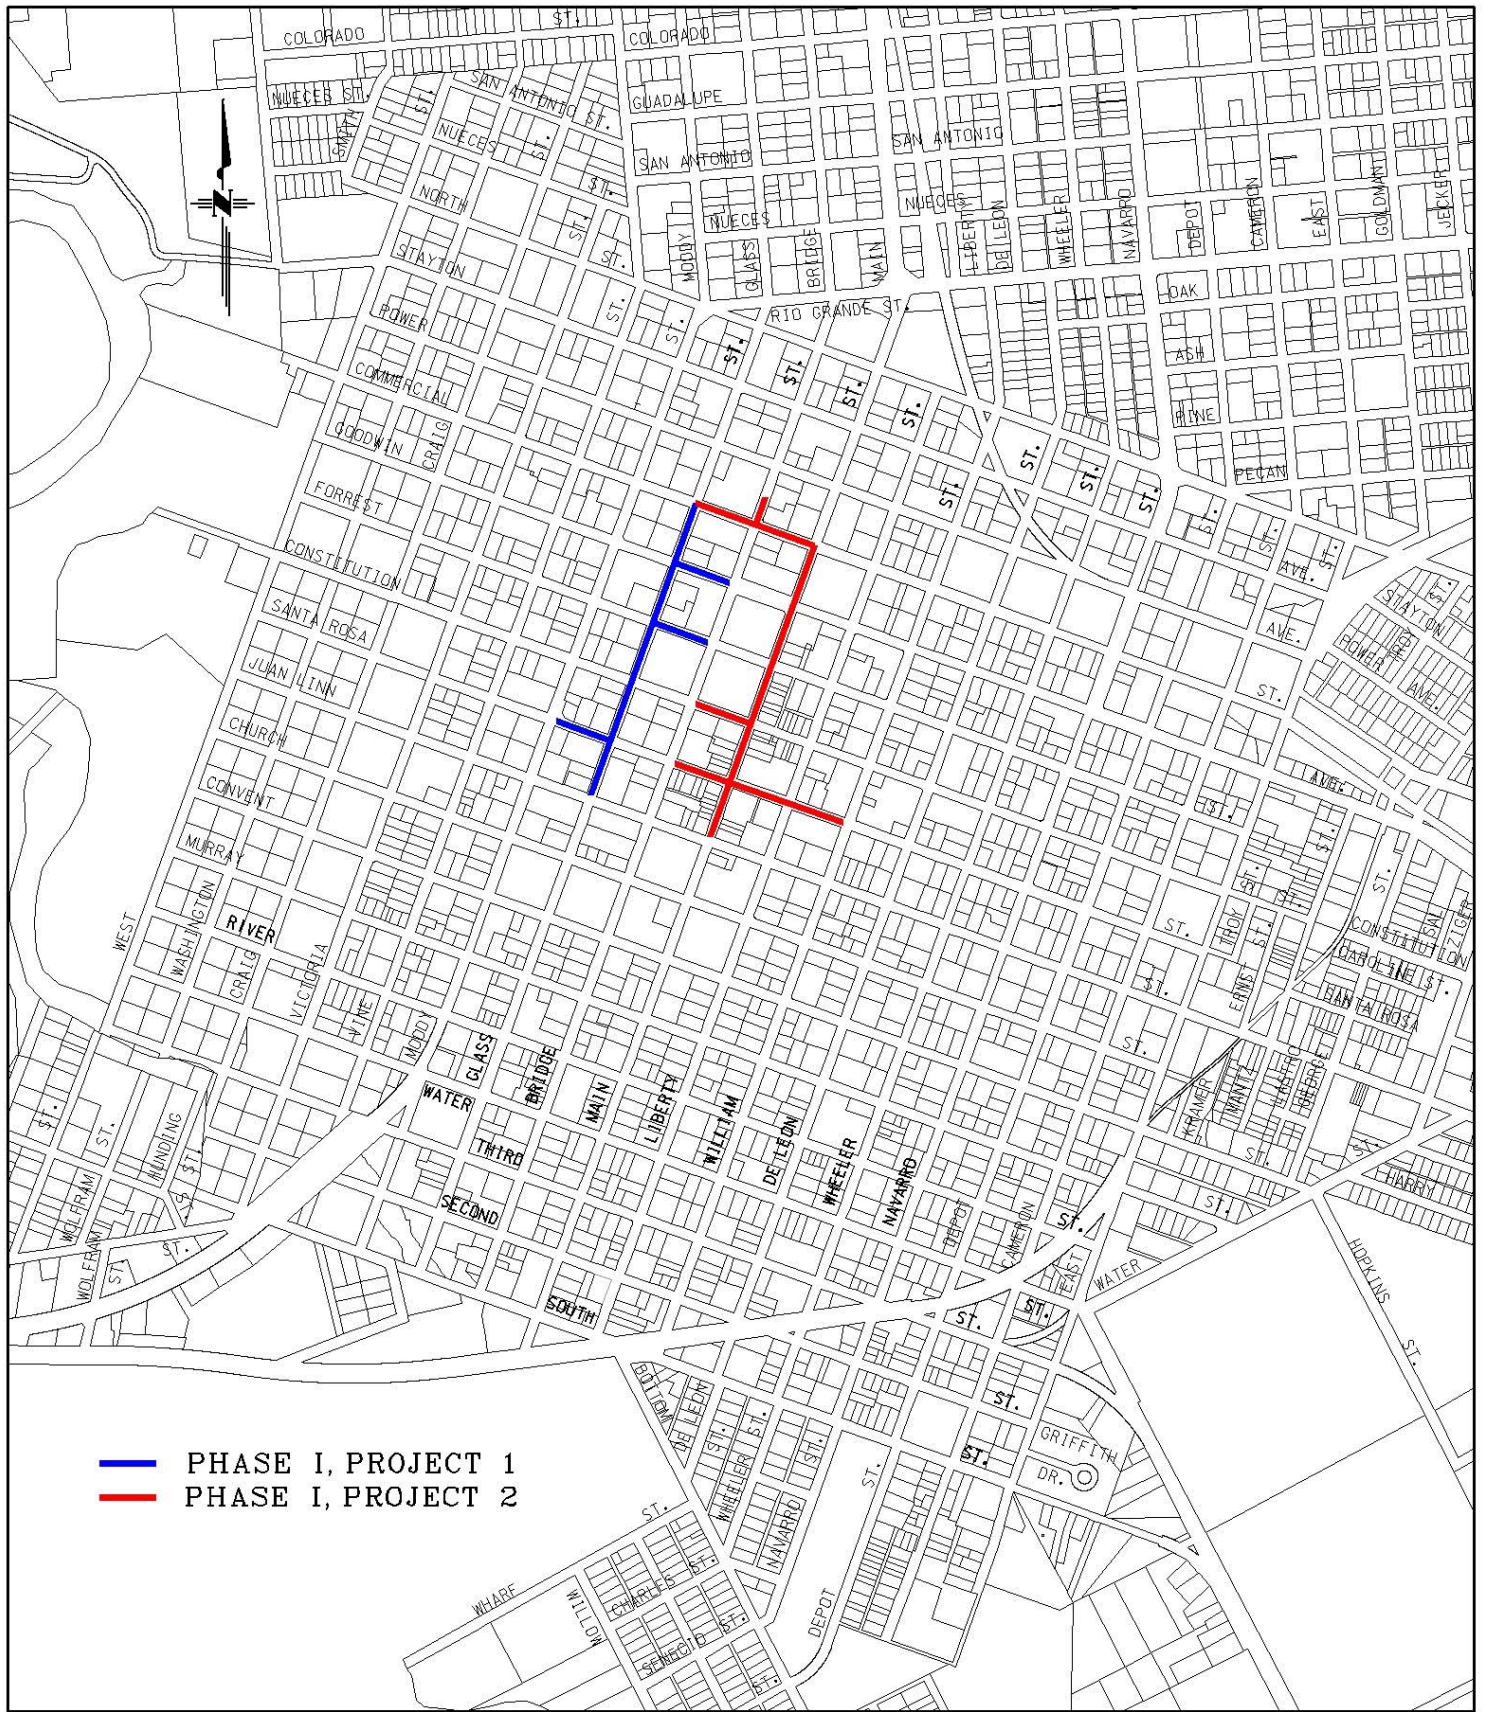

Although the City has taken measures to reduce the inconvenience to businesses, residents and motorists by limiting the amount of area the

contractor can have disturbed at any one time, drivers can expect major delays in the work zone and should use alternate routes to get around the work zone if possible.

This construction is part of the \$2,913,062 Downtown Water and Sewer Line Replacements (Phase I, Projects 1 & 2). The contractor performing the work is Triple B Services, LLP from Huffman, Texas. This project is projected to take approximately 8 months to complete.

A map of the entire project area is located on the attached map.

For more information, contact the Public Works Department at 485-3340.
